John Bowe to drive Polar Formula Vee!

Sydney, New South Wales – March 5, 2007 – Polar Racing Cars is pleased to announce that V8 Supercar driver, John Bowe, will test drive the factory RW05 Polar Formula Vee on March 15th at Wakefield Park.

Australian motor racing legend and past Australian Touring Car Champion, John Bowe, will return to his motor racing roots aboard the Polar Racing Cars Formula Vee. It is almost 30 years since John Bowe adjourned the seat of an entry-level Formula Vee open wheeler, and after winning the Tasmanian Formula Vee Championship at age 16 and 17 respectively, he is looking forward to the challenge of stepping back into the class that launched his successful career.

“It’s been a long time since I have driven a formula vee, but I can’t wait to experience the evolution that Formula Vee has undertaken to become one of Australia’s leading categories for junior development. It proved to be a great learning ground for my career, and I have no doubt that this class will produce many champions of the future. I’m excited to jump in the seat again!”

Formula Vee is one of Australian motor racing’s foundation formula’s and an age old proving ground for junior motor racing development. The formula has undergone intense development in recent years to now boast the highest average grid density in Australian club motorsport. With new generation cars being manufactured and dominating the abundant fields, the Formula Vee Championships are hotly contested by budding drivers around the country.

“It is a pleasure and an honour to have a driver of John Bowe’s stature and successes drive the factory Polar Formula Vee. John has been named as the second best race car driver in Wheels’ Race Car Drivers of All Time Awards on three separate occasions, and I look forward to the feedback he has to offer following the test,” said Mark McHenry, Polar Racing Cars’s Director and engineer.

Polar Racing Cars is one of Australia’s leading manufacturers and suppliers of Formula Vee race vehicles and accompanying composites. The Polar marque has been recognised with the manufacture of competitive Formula Vee open-wheelers for over 10 years, notorious for its modern and sleek styling. Polar Racing Cars thrives on innovation, enhancement and progression within Formula Vee and aims to bridge the gap between “entry-level” and progressive forms of motor sport. www.polarracingcars.com
